MACAM MANA NI?

Wouldn't it be nice if we are able to peacefully talk, agree, disagree, praise and criticise policies and decisions of the government, the opposition and civil society? Wouldn't it be nice to be able to write articles, read books and surf the Internet without fear that we will be punished?

Wouldn't it be nice that television and radio report issues and air programmes without any external control?

Wouldn't it be nice if public bodies are more open and publish more information transparently?

Wouldn't it be nice if we are able to easily obtain information that we ask for from public bodies?

Wouldn't it be nice if public bodies ask us for our views and give reasons for their decisions?

Wouldn't it be nice if our personal information (e.g. IC and handphone numbers) are kept private and not made available to others without our permission?
